	PAGE
Textural and Isotopic Characteristics of Tectonic Hydrothermal Breccias in Fractured Carbonates in Northeast Thailand, a Contrast With the Features of Meteoric Karst Breccias <i>Anh Tuan Nguyen</i>	1-11
Depositional Environment and Reservoir Properties of Shallow Oil in Plamuk Area, Pattani Basin Gulf of Thailand <i>Arin Sangsuay</i>	12-16
Diagenetic Effects on Reservoir Properties in a Carbonate Debris Deposit: Case Study in the Berai Limestone, “M” Field, Makassar Strait, Indonesia <i>Chrisna Asmiati Tanos</i>	17-24
Structural Style of Songkhla Basin, Gulf of Thailand <i>Heliosita Anggraeni Kartikasari</i>	25-31
Maturity Modeling of the Songkla Basin <i>Jana Maulana Supriatna</i>	32-35
Fault Control on Hydrocarbon Distribution in North Carnarvon Basin, NW Shelf Australia <i>Jedsada Nantawuttisak</i>	36-39
Analysis of Seismic Facies, Lithology and Reservoir Potential of the Early to Middle Miocene Pagasa Formation in the Southwest Palawan Basin, Philippines <i>Jeffrey Guevarra Acosta</i>	40-45
The Stratigraphic Trap in the Benchamas Field Pattani Basin, Gulf of Thailand <i>Jurairat Buangam</i>	46-52
Pore Pressure Prediction and Distribution In Arthit Field, North Malay Basin, Gulf of Thailand <i>Nutthaphon Ketkiao</i>	53-57
Fluid History of Hydrothermal Textures in an Exposed Quarry in Chumphae District, Khon Kaen Province, Northeast Thailand <i>Phung Thi Lan Phuong</i>	58-65
Comparison of depositional environments and reservoir characterization of “O-sands” in Pailin and “Thick stacked sands” in Benchamas Fields, Pattani Basin, Gulf of Thailand <i>Pimlada Veerapongwattana</i>	66-69

Structural style and tectonic evolution of the Nakhon Basin, Gulf of Thailand <i>Piyaphong Chenrai</i>	70-75
Trapping Mechanisms along North Similan and Lanta Trends, Pattani Basin, Gulf of Thailand <i>Piyaporn Aukkanit</i>	76-81
Structural Development of Thrusts, Folds and Fractures in Quarry Exposures of Permian Limestones, Saraburi Province, Central Thailand: Implication for Fracture Reservoir Development in NE Thailand <i>Prueksarat Ampaiwan</i>	82-90
Architecture of Middle Miocene to Pleistocene Sands using 3D Seismic in the Songkla Basin, Gulf of Thailand <i>Rully Firmansyah</i>	91-95
Structural Style and Fracture Characteristics of Thrusted and Folded Permian Carbonates in the Siam City Cement Company Quarry, Tabkhwang, Saraburi Province, Central Thailand; Analogs for Fractured Carbonates <i>Suphawich Thanudamrong</i>	96-107
Depositional Environment and Facies in Units 2A, 2B and 2C of The Graben Trend in Arthit Field, North Malay Basin, Gulf of Thailand <i>Tanyarat Polchai</i>	108-111
Sand Distribution and Depositional Environments East Yala Field, Pattani Basin, Gulf of Thailand <i>Thananya Rinsiri</i>	112-118
Carbon Dioxide Distribution in Erawan, Platong and Pailin Fields, Gulf of Thailand <i>Weerawat Kongnonkok</i>	119-125
